

## Wednesday Challenge Form

Group Members: The whole class, but my partner was Tony

Problem Statement: To make a structure, designed by Dr. Neat, when one person is blind folded and the other is giving instructions

Approach: Some people made loud noises and told the other person to follow the noise. Some told people to follow their voices, and that is what me and Tony did.

Solution: We did not finish in time

Lessons Learned: Teamwork was key and giving clear instructions was key
