

Date:

Wednesday Challenge Form

Group Members: Tyler, Carlos, Dimitri, and me

Problem Statement: Construct a 90 degree angle using only 3 straws. You may use anything else.

Approach: We put two metal pieces together to form a 90 degree and we used it as a template to put our straws in.

Solution: We won the Wednesday Challenge by a score of 0.02779379962

Lessons Learned: We learned that smaller groups work more effectively.
