## Wednesday Challenge Form

Group Members: Jonathan

**Problem Statement:** Make a device that can make a Pringle stay factory condition. We have to deliver it to the Neat house and back.

**Approach:** For our design was to make a 5x5x5 box and fill it with cotton balls to provide cushion for the chip. The PDF we received was a 20cm x 20cm x 20cm filled with pet bedding to provide cushion.

**Solution:** ?

**Lessons Learned:** ?
