

## **Group Members: Tyler's Team**

---

**Problem:** Everyone has a tube in their hand. You have to sit in a circle and toss the tube to the left all at the same time. If you all catch it, then you do it standing. If you drop it standing you have to sit again and start back over. If you all catch it standing, then you throw it every other person. If you all caught it, then you're done with all three trials. First group to do all three in a row wins.

---

**Approach:** We practiced and had Ian lead us to the win. On the last trial, we had every other person face outside the circle, while the others faced inside the circle. This made the throw and catch easier

---

**Solution:** We WON!!!!

---

**Lessons Learned:** Practice makes perfect and leadership is key
